I have created a personalized program and treatment for individuals with Trichotillomania and Dermatillomania. Serving children, adolescents, and adults, I offer cognitive-behavioral therapy, including Habit Reversal Training (ComB), for both hair pulling disorder and skin picking disorder. From a Cognitive-Behavioral Therapeutic basis, each person is evaluated and treated in a collaborative way for the best results. If you are thinking nothing will help you, you are wrong. Let us work together and make some results happen.
